Technical Data

Explore your many sides

Exploring is part of who we are. From everyday discoveries to great voyages, you need a bold companion to explore the world. To explore yourself. Someone like the new Škoda Kamiq.

With the Kamiq, the go-anywhere capabilities of the small SUV are packaged in a playfully creative design. Inside, it is as attractive and functional as ever with a long list of comfort, connectivity and safety features. Life is made easier with touches of everyday magic like the LED headlights, Climatronic panel, Virtual Pedal and an immersive infotainment display.

That's the smart way to explore. That's what we call Škoda.

Explore beauty from every angle

The attractive new look starts in the front, with the wider grille, sharper headlights and distinctive new bumper. Together, they give the new Kamiq a more solid, dynamic style. Driving away, the rear bumper with integrated diffuser and restyled rear lights will catch your attention. A family explorer with striking looks.

Panoramic roof

On the outside, the panoramic roof underscores the sleek, stylish look. On the inside, it brightens the interior and opens the view of the sky above.

Unmistakable shape

Together with rear reflectors, the taillights create the characteristic C-shape, making the Kamiq easily identifiable at the first look. The revamped rear bumper with Platin Grey integrated rear diffuser adds to the bold style.

Virtual Pedal

Full hands are not a problem anymore. With Virtual Pedal, just a swing of the foot under the bumper is enough to open the door. Available in combination with KESSY and electric 5th door.

KESSY

No more hassle looking for your keys. With the Keyless Entry, Start, and Exit System, the doors unlock or lock again with just a touch of the door handle. You just need to have the key in your pocket.

Exploration begins within

Family friendly, yet also driver focused and stylish. The new interior's dominant features include the 10" Virtual Cockpit and the 9" Škoda Navigation in the middle of the dashboard. The dashboard also boasts a choice of new upholstered décors made of fabric, Suedia or the new Carbon look. These are matched by the redesigned seat upholstery for all trim levels. The new ambient lightning with two switchable colours sets off the atmosphere with a finishing touch.

Climatronic

Maintaining a pleasant climate on board is now easier than ever. The Climatronic air-conditioning system is fitted with a pair of buttons that allow you to adjust the air flow without taking your eyes off the road.

Fulfilment is just a tap away

In today's connected world, you need your everyday companion to take care of your digital needs seamlessly. Whether charging your devices or providing the latest information on a large screen, the Kamiq has you covered.

Always charged

The magnetic holder charges one phone using the Qi2 standard at up to 25 watts and holds it securely in place for best charging efficiency. The compartment is easily accessible and provides ventilation for the device to prevent it from overheating.

Connectivity

You can display your apps on the Infotainment display using Apple CarPlay and Android Auto either wirelessly or via the USB-C ports, which also offer fast 45 W charging for your devices.

Škoda Connect: Take the online world with you

Stay connected wherever you are. Being fully and permanently online means always having access to entertainment, information, and possible assistance while on the move. Škoda Connect is your gateway to a world of unlimited communication options.

MyŠkoda

Enjoy full control of your car. Download MyŠkoda and access all necessary services anytime, whether it's driving data, fuel range, lock and unlock or even where you last parked.

Online Traffic Information

With Online Traffic Information, you always receive the latest details, saving you time and the stress of sitting in traffic jams. If enabled, the navigation system will automatically recalculate the route to ensure you arrive at your destination on time.

Full of surprises, just like you

You and your family or friends can explore the world while the Kamiq takes care of the small things. Everything you might need can be easily stored in various handy spaces around the cabin. Always on hand, always ready to explore.

Box for rear passengers

Rear passengers will enjoy the smart storage box on the centre tunnel. It includes a flexible cupholder which can be folded away when not used to make more room for anything they might want on hand.

Double pocket

Keep your things organised with the double pockets on the rear sides of the front seats. The larger one is perfect for a notebook or a laptop computer, while the smaller one nicely fits a smartphone.

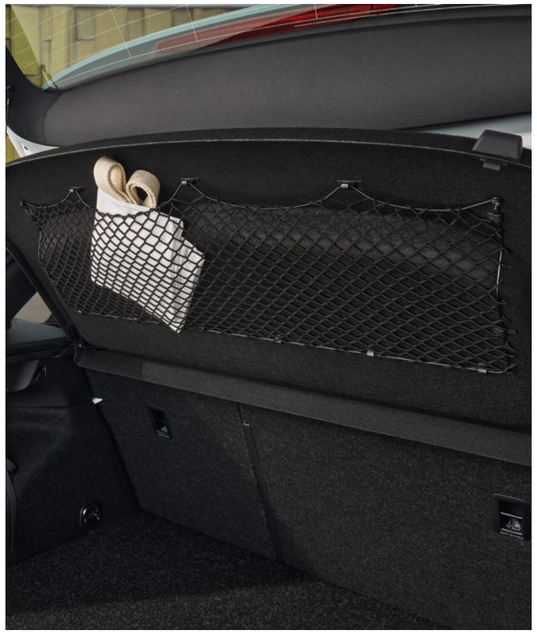

Net programme

Everything in its place and easy to see. This set of three nets keeps your items from moving around while keeping them in good view.

Treat your things like passengers

Wherever your adventures take you, it's always good to have room for everything. It's even better to have things well-organised and securely stored. With 400 litres of luggage space and various thoughtful details and storage options, you'll never have to leave anything behind.

Net pocket

Lighter items that need to be on hand even when the boot is full can be stored in the practical net, out of sight under the luggage room cover.

Cargo elements

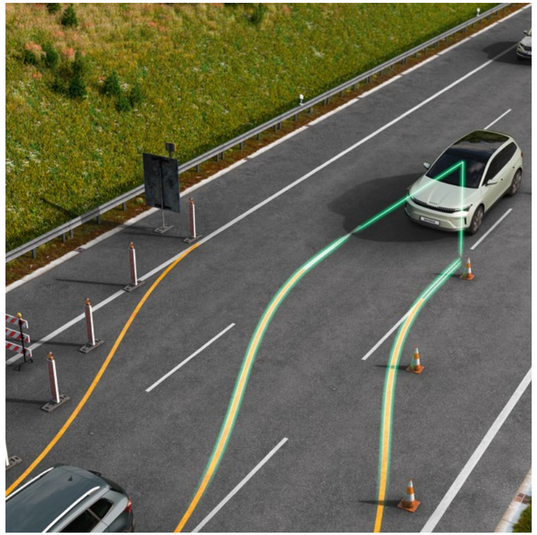

The easy way to secure larger items. Cargo elements are fixed to the floor using velcro and can be folded into any angle.

Predictive Adaptive Cruise Control

Using a radar device, camera equipped with traffic sign recognition, GPS technology and detailed information from the road map, PACC can predict driving conditions for the next 1–2 km. As a result, the system can automatically adjust the cruise speed when necessary – typically before a turn or roundabout, or when entering an area with a reduced speed limit. The system increases driver comfort and driver safety while also reducing fuel consumption and CO_2 emissions.

Travel Assist

The Travel Assist system combines Adaptive Cruise Control (including Front Assist) and Adaptive Lane Assist functions. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, the system runs issues a visual and audible warning and eventually disengages.

Adaptive Lane Assist

The system is capable of keeping the car in the middle of the correct lane and of alerting the driver in case of deviation. It can also take control of the car in the event of lane changes during roadworks.

Side Assist

Using radar sensors in the rear bumper, Side Assist (which can detect other vehicles and harder to see objects like cyclists up to 70 m away) monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

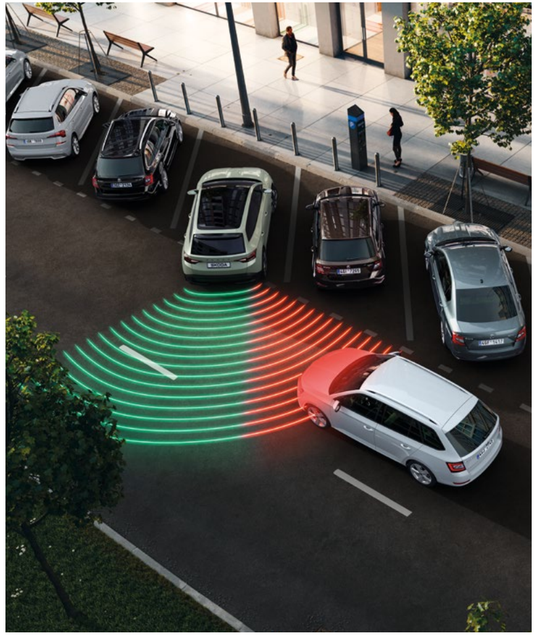

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Matrix Beam Function

The LED Matrix headlights feature Matrix Beam Function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the Matrix Beam Function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate the road. The Matrix Beam Function also uses information from the navigation system. Thanks to it, the high beams will only turn on when you are out of a built-up area.

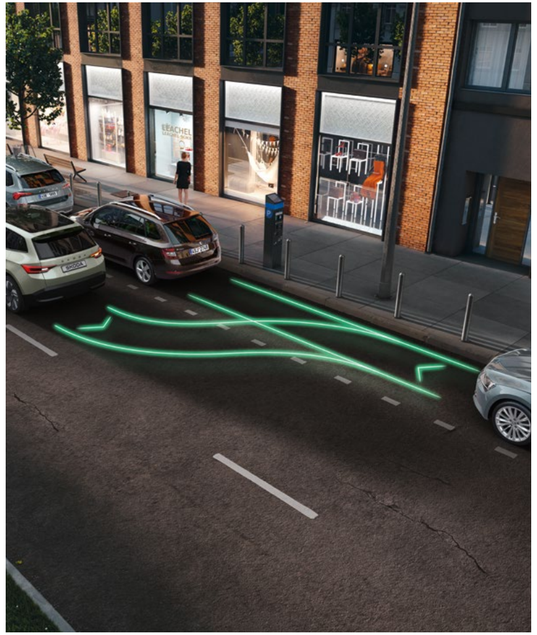

Additional experts on board

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Rear Traffic Alert

Using the Side Assist sensors in the rear bumper, Rear Traffic Alert helps you reverse safely from a parking space during poor visibility. It can even engage the brakes automatically if it detects imminent danger.

Park Assist

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place and safely parks in a row of parallel or perpendicularly parked vehicles.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Studio interior

Grey metallic pad with glossy black décor
Black/grey fabric upholstery

Essence

The standard equipment of the Essence version includes 9" Škoda Navigation, 8" Digital Display, manual air conditioning, Bluetooth, rear sensors, LED headlights and more.

Studio

The Studio interior boasts a modern, practical design in a combination of black/grey upholstery with grey metallic pad, glossy black décor and satin black door inserts.

Loft interior

Krepp pad with glossy black décor
Krepp/black fabric upholstery

Selection

The standard equipment of the Selection version includes electric windows front and rear, multifunction steering wheel, fabric dashboard pad, height-adjustable front seats, Hill-Hold Control, Easy Start, LED fog lights, mobile phone pockets and more. The Selection trim is available with a choice of four interior design selections.

Loft

The Krepp fabric upholstery of the dashboard pad and seats, together glossy black décor give the Loft interior a stylish contemporary feel.

Lodge interior

Grey Suedia pad with copper décor
Grey Suedia/black fabric upholstery

Selection

Lodge

The combination of grey Suedia pad and upholstery with copper décor and two-colour ambient lighting give the Lodge interior a feeling of luxury, underscored by the leather multifunction steering wheel, floor mats, and rear armrest.

Dynamic interior

Black Suedia pad with red décor
Black Suedia/black fabric upholstery

Selection

Dynamic

The centrepiece of the Dynamic interior are the sports seats, complemented by the sports steering wheel, black Suedia pad and red décor. The black roof liner, sports pedal covers, and door sills with "Kamiq" lettering complete the sporty theme.

Suite interior

Black Suedia pad with chrome décor
Black Suedia/black leather upholstery

Selection

Suite

The elegant style of the Suite interior starts with the black leather/Suedia seat upholstery and is further emphasised by chrome décor and black Suedia pad. The leather steering wheel, heated front seats and electric driver's seat complete the image of luxury.

Our sporty legacy, now yours

In the true spirit of Škoda's rallying legacy, the Kamiq Monte Carlo is ready to take you through the wintry mountains as well as into the glamorous city streets. A sporty style for a night on the town or a weekend out of it.

A champion on every road

Joyful and functional. The unmistakable looks start with the aerodynamic front bumper with integrated spoiler, further enhanced with the gloss black details. The TOP LED Matrix headlights come as standard so you can see and be noticed.

The gloss black diffuser in the back highlights the bold shape of the rear bumper and underscores the sporty flair of the Kamiq Monte Carlo. The drivers behind you will also notice the cool gloss black lettering.

Treat the extrovert within you

The dynamic features of the Monte Carlo interior empower you to enjoy driving even more. The design and the materials are there to bring a touch of magic to your everyday journeys. The Carbon look dashboard pad and Carbon door inserts create an attractive, modern style, highlighted by the signature red accents on the upholstery. The multifunctional sports steering wheel in perforated leather, sports pedal covers, and black headliner contribute to an energetic atmosphere that amplifies your driving pleasure. The rich feature list, including Climatronic climate control, 8-speaker stereo, and adjustable ambient lighting, enhances comfort, while Drive Mode Select allows the driver to choose between the spirited or relaxing character of the Kamiq.

Accessories

Genuine Accessories for a seamless fit

The magic is in the details. It's the little things that make your Kamiq perfectly suited to your way of life. Take your pick from Škoda Genuine Accessories and create a tailored experience.

Transport all the things that you need for your active lifestyle. Be prepared for adverse weather, be it rain, mud, or snow and ice.

Make the interior even more cosy and welcoming with a choice of decorative strips and textile foot mats, or add a dose of ruggedness with the all-weather mats.

To make your time on the road easier and more fun, you can choose from a plethora of clever features. From multimedia holders to door-mounted bins and various holders as well as boot mats and organisers. Need a drink or a snack on the go? The thermo-electric boxes and even a portable coffee maker are ready for you.

To make travelling with your little ones easy and safe, we've also prepared a comprehensive line of child seats.

Adapt your Kamiq to seamlessly fit your way of life.
