

CONFIRMATION

Radio Type Approval / Exemption in Turkey

Dear Sir/ Madam,

the Turkish Telecommunications Authority is no longer responsible for type approval of telecommunication products. In future, market surveillance of telecommunication products will be the responsibility of the Telecommunications Authority.

The authority "**Under secretariat of Prime Ministry for Foreign Trade**" is now responsible for telecommunication products. Any telecommunication product which fulfils the RED requirements (Directive 2014/53/EU) can be imported into Turkey.

The RED standards, confirmed in *CE declaration of conformity*, issued by manufacturer will be sufficient for import. The local importer/distributor has to show the Type Examination letter for imported devices (class 1 and 2) on request. The authority "Undersecretaries of Prime Ministry for Foreign Trade" is in charge of this issue.

In provided attachment (source: <https://www.btk.gov.tr/uploads/pages/sinif-1-guncelleme-son-2019-03-25.pdf>) you can find technical relationship to radio characteristics, related to the components of system "37W", manufactured by **HELLA GmbH & Co. KGaA**.

This means that the components **013854, FS19, FS197 and RSB19** as parts of system "37W" are exempted to be individually type approved in Turkey.

In case you have any further question, please do not hesitate to contact 7layers.

Best regards,

Markus Bauks
