Technical Data

This is Peaq comfort

The brand new Peaq cruises in as the new flagship of the Škoda fleet. Bigger and more advanced than any Škoda before, it offers unparalleled comfort on the road – or even when parked.

Its large dimensions are a perfect canvas for the simple lines and robust details of the Modern Solid design language. Its focal point is the new Tech Deck Face in front, housing sensors for driving assists. T-shaped LED lights front and back create an unmistakable signature.

Inside, the 4.87-metre-long Peaq provides an unrivalled amount of space. It is the first electric Škoda that can seat up to seven passengers – and all of them in complete comfort. The new vertical infotainment, together with new Sound by Sonos stereo system and Relax seats offers a unique experience, enhanced by the new Wellbeing app. On the practical side, there's up to 935 litres of boot space.

The Peaq also offers the longest range in the Škoda line-up. It can drive more than 610 km with the larger 91 kWh battery. A smaller one with 63 kWh is also available. Both include bidirectional charging to power your appliances (V2L), your home (V2H), or even to supply energy back to the grid (V2G).

This is a new peak of what Škoda can offer. Space, technology, and power in one stylish package.

Engineered art

Bold style on a grand scale. The new Peaq is not only the largest Škoda, it also exudes a powerful presence. The T-shaped headlights and rear lights create an easily recognisable light signature. The eight vertical slats in both the front and rear bumper add a touch of robustness to the imposing and elegant look of our new flagship.

Modern Solid Design

Beauty is in simplicity. The robust yet elegant look of the new Peaq is built on straight lines. The new Tech Deck Face with light band emphasises this with a unique light signature and adds a high-tech, futuristic touch.

Aerodynamic rear

Simple, bold shapes can make for great aerodynamics. The roof spoiler and rear diffuser help the airflow, contributing to the drag coefficient of 0.25.

Virtual Pedal

Opening the boot is easy even when your hands are full. Just use the Virtual Pedal – a simple, straight kick underneath the bumper will open or close the power tailgate automatically.

Digital Key

There's no need to carry a physical key anymore. Just install the Digital Key on your phone. It works just like a normal key. You can also share the key via the Wallet app.

A space to relax

What if you could drive your living room? The new Škoda Peaq lets you do exactly that, with style. Seven seats mean you can take your family or friends along on the road. The fold-out table lets you picnic even when the weather disagrees. The new 13.6" vertical infotainment becomes the focal point that provides information, entertainment, or even sets the right mood for the moment. Just select one of the modes of the Wellbeing app for a moment of relaxation and calm, or to stretch your arms after a long drive. Enjoy it in the shade or under the stars with the new panoramic roof with Dynamic Shade Control. And of course, you can choose from a range of attractive Design Selections. This is the Peaq of family driving.

Cockpit of the future

The compact 10.25" driver display in the Peaq is meticulously designed to present only the essential information for an electric car driver. In addition to standard driving data, you can prioritise navigation, driving assists, or both. The most important content can also be projected onto the Augmented Reality Head-Up Display, including "floating" navigation arrows.

High-tech lounge

All the information and the right mood. The head-up display and driver display put the most important things right in front of your eyes. The brand new 13.6" vertical display provides more detailed information. You can also make it your own with the selection of apps from the Škoda Connect Shop.

Vertical display

Controls on hand and information in the field of view with the new 13.6" vertical display. The new configuration makes it easier to use while driving, while the infotainment uses the latest Android-based system and offers the possibility of downloading Škoda apps.

* Black headliner and three-spoke steering wheel available as an option.

Relax seats

Turn your seats into comfortable armchairs and just relax or listen to your favourite music. The Relax Mode, available only when parked, reclines the seat into a comfortable position and folds out a leg rest for even more comfort. You can enjoy the ergonomically designed seats and massage function at any time.

Panoramic sunroof with Dynamic Shade Control*

Pleasant shade or a clear view? That's up to you. Simply dim the panoramic roof to protect you from sunlight or make it clear so you can watch the stars. You can set any combination of nine segments to dim or clear mode.

* Available at a later date.

Relax Package

Enjoy a moment of calm, a time to properly relax. Turn the front seats into comfortable lounge chairs with Relax mode and select one of the massage programs. Rest your head on the comfortable pillow. Treat yourself to a drink or a snack from the handy table on the centre console. Let the Wellbeing app set the mood you like. And, of course, enjoy the immersive sound by Sonos. It's a time for yourself.

Connectivity

With MyŠkoda application, you can access important information and controls remotely from your phone. The Peaq also comes with Pay to Park and Plug & Charge functions. With Apple CarPlay or Android Auto, you can safely and easily use selected smartphone apps on the infotainment screen.

Centre console

A pair of illuminated magnetic holders provide charging for two phones using the Qi2 standard with up to 25 watts. They also keep the phones securely in place for optimum efficiency. The compartment is also easily accessible and provides cooling to prevent your devices from overheating.

The three physical toggles on the centre console let you easily control the climate in the car. The outer ones control the temperature for each side of the cabin. The inner one allows you to choose from five levels of ventilation intensity.

16 speakers

Immerse yourself in the clear and intensive 3D sound. The 16-channel premium sound system includes a subwoofer, two surround speakers, a centre speaker, and even two A-pillar mounted 3D speakers to make you feel like the cabin is filled with sound.

Sound by Sonos

The new sound system created in cooperation with Sonos delivers the brand's signature clear sound reproduction, a balanced listening experience, and an immersive three-dimensional sound. Enjoy your favourite music or podcast while driving or enjoy a moment of mindfulness while parked.

Three-row seating

Have a big family or enjoy a trip away with your friends? Order your Škoda Peaq with optional third-row seating, allowing it to seat up to seven passengers. It also offers a wide range of storage spaces for your various necessities, from drinks to electronic devices, which can be powered from the USB-C ports on both sides.

Rear seats

Wide enough for three, or with extra comfort for two. The fold-down armrest comes with a cupholder. You can also place your food, drinks, and small items in the storage compartment on the rear tunnel.

Space folded into ideas

It’s not just about all that room. It’s about the clever way it’s used. Everywhere you look, you will find ingenious details and clever ideas. But most of all, lots and lots of room.

Third-row seats

Space for everyone. The optional third-row seats in the Peaq fold out from the boot floor, allowing you to choose between more cargo space or space for seven. They even come with their own cup holders, storage compartments, and USB-C ports.

Boot

Space for everything. In the standard, five-seater version, the Peaq offers up to 935 litres of cargo space. The seven-seater is still able to hold 299 litres behind the third row, or 890 litres with the rearmost seats folded. Need a really huge space? Fold the second row and get up to 2,150 litres for lots of cargo or really large items. And it is not just about space – with its various smart features and compartments, the Peaq takes the ease of transporting both small and large items to another level.

Double floor

There's even more space hidden under the floor. You can use it for items that you need to keep separate from the rest of your luggage, or you can simply remove the floor and increase the space. In the five-seater version, the floor can be set at different heights.

Smart storage

There's space for everything, and everything has its place. The boot of the new Škoda Peaq is full of clever ideas. There are storage compartments, smart hooks for hanging up bags, plus dividing nets and cargo elements to neatly organise your luggage.

Electric roller cover

Keep your luggage hidden and shaded from the sun at all times. The electric roller cover automatically opens and closes with the tailgate.

Frunk

Your charging cables, electric rollo or car essentials like brush. Those are the items that can be always on hand in your frunk. Of course, with 37 litres of volume, there's also a space for a lot more.

Turn Assist and Swerve Support

Turn Assist monitors opposing traffic when turning left at low speeds between 2 and 15 km/h. In critical situations, it can stop the vehicle. Swerve Support helps the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing any accident with a controlled evasive manoeuvre.

Travel Assist

Travel Assist utilises several advanced driving assistance systems and features to enhance comfort and safety in various situations. Improved lane keeping functionality with assisted lane change functionality and intelligent speed adjustments makes driving easier, while other safety features, like Turn Assist, make it safer. However, the system must still be constantly monitored as the responsibility always lies with the driver.

Exit Warning System

When your car is stopped and you open any door, the system will check for other road users, such as vehicles, cyclists, runners, or pedestrians, at a distance of up to about 40 metres. If it detects an approaching object, it warns the passengers in the front and rear, both visually and audibly, about getting out of the vehicle.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Trained Parking

A highly advanced parking assistant is used to automatically complete a parking manoeuvre in a familiar environment, e.g., at home. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to the garage or a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself. You simply monitor it from the driver's seat.

Additional experts on board

To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

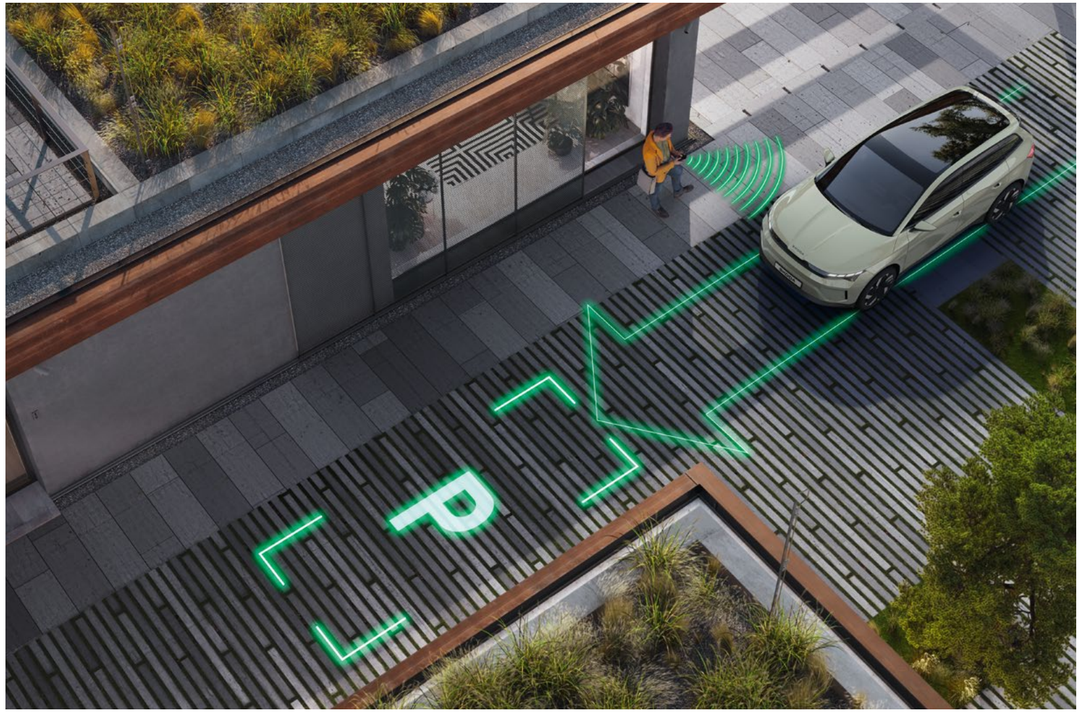

Reversing Assist

A difficult spot to reverse out of? Let your car do it. Reversing Assist remembers the way in and can back out automatically for distance of up to 50 metres. You just need to control your speed using the pedals and watch over the whole process, as the car steers itself.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Remote Trained Parking

Train your car to perform a parking manoeuvre and oversee the process from the outside. Remote Trained Parking is a highly advanced parking assistant which enables the car to perform familiar parking manoeuvres without the driver being present in the car. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to a parking space. After that, as soon as the car recognises the scanned route, it will ask you via the infotainment whether it should take control. Following your approval, the vehicle will park itself, as long as you stay next to it and monitor the process for safety. You simply monitor it from the outside, using your phone app.

Remote Parking

Let your car park itself while you just watch from the outside. With Remote Parking Assist, you can use the Intelligent Park Assist feature to park in parallel or perpendicular spaces. Finally, you can move the car in or out of the parking space. For safety, the driver needs to watch the whole process and control the car by keeping the button in the app pressed.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Loft interior

Grey Techtona pad with grey stitching
Grained Stripes décor
Grey textile seats with black Techtona

Design Selections for the interior

Create your own space that reflects your style and personality. Each trim tastefully pairs an attractive upholstery with dashboard décors, headliner colours, and distinctive details. Design Selections also include optional comfort features, including the AGR-certified Relax seats.

Design Selection Loft

The grey fabric on the seats is complemented by the grey stitching to create a relaxing feel that is reflected in the grey Techtona pad, also with grey stitching. The look is rounded off by the grained Stripes décor.

Lodge interior

Grey Techtona pad with light green stitching
Grained Maple décor with Sense of Light Speckles foil
Grey embossed textile/Suedia/green tone Techtona seats

Design Selection Lodge

The seats feature grey embossed textile material in combination with a green tone Techtona, while the green stitching sets off the whole look. This is complemented by grey speckles Techtona pad with light green stitching, and the grained Maple décor with Sense of Light speckles foil provides the perfect finishing touch.

Suite Black interior

Black Techtona pad with grey stitching
Grained Maple décor with Rising Dust foil
Black/grey Vachette leather with grey stitching

Design Selection Suite Black

The seat upholstery combines black and grey Vachette leather with grey stitching, which is also used on the Techtona dashboard pad. The steering wheel is also upholstered in leather. Finally, the grained Maple décor and Rising Dust foil bring all of the interior elements together.

* Black headliner and three-spoke steering wheel available as an option.

Suite Ceramique interior

Techtona Ceramique pad with grey stitching
Grained Maple décor with Rising Dust foil
Techtona Ceramique with grey stitching

Design Selection Suite Ceramique

The focal point of this Design Selection is the Techtona Ceramique seat upholstery, which brightens the interior with its light colour and is complemented by grey stitching. The same combination is repeated on the dashboard pad. The grained Maple décor with Rising Dust foil is the finishing touch that completes the stunning play of contrasts.

Sportline

Charged with sportiness

A living room with sporty vibes. Blacked-out details and aerodynamic elements give the Peaq Sportline unmistakable dynamic flair. Sports seats, Suedia, and Carbon-look pieces complete the unique look. A sporty feel for the whole family!

Sporty style

The sporty style begins with the black front bumper spoiler and continues with glossy black details like the mirrors and sill covers. A black roof is available as an option. The look continues with black lettering, Sportline badges, and Sportline-specific 20" brushed wheels with smoky top coat. LED Matrix headlights with light band illuminate what's ahead.

Putting comfort in sport

Inside the new Peaq Sportline, competitive DNA meets ultimate space and comfort for your family.

The seats are upholstered in Suedia with white stitching. The sports seats in front will hug you and hold you during a spirited drive, while also retaining the optional Relax mode for the times when you want to chill in your car for a while.

The Carbon-look décor on the dashboard and doors adds another touch of sporty flair, while the Sportline door sills and aluminium pedals complete the whole experience, welcoming you and your passengers in style.

You'll also get SunSet tinted windows, phone box with dual illuminated Qi2 wireless charging with magnetic holders, Digital Key, power front seats, and 230 V socket in the boot.

Sportline interior

Black Suedia pad with white stitching
Grained Stripes décor with Glacier Metallic foil
Suedia/black fabric/Techtona seats with white stitching

Design Selection Sportline

The sporty look meets luxury with the combination of Suedia, fabric and Techtona, all in black colour, on the seat upholstery. The Cool White stitching adds a striking contrast a striking contrast. The Suedia material and white stitching is repeated on the dashboard pad, while the grained Stripes décor with Glacier Metallic foil completes the look. The sports steering wheel with paddles adds a sporty finishing touch.

Accessories

Genuine Accessories that perfectly fit your car

You pick the perfect furniture to make your house the perfect home for your family. With Genuine Accessories, you can give your Škoda Peaq just what it needs to be your family's perfect home on the road.

Make your car stand out on the road with a set of alloy wheels – you can even get colour-matched ones. Add decorative sill strips and premium carpets to enhance the look – or protective sill foils and all-weather mats to protect it.

With a choice of roof boxes, roof racks, and bicycle racks, you can carry everything that can't fit inside the car. Boot accessories such as nets and mats will make it easier to pack what can fit.

You can also make your trip more comfortable with the sleep package, device holders, and clothes hangers. For refreshments, you can fit a cooler or even a portable coffee maker.

No hotels on the way? Easily transform your Peaq into a comfortable sleep space by packing our levelling boards and sleeping mats.

And of course, we also have a range of child seats for your little ones. Make your Peaq the peak of family motoring!

Roof box *

( ) Applies to the 7-seater version.

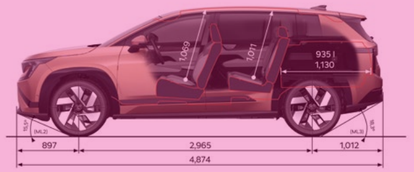

WLTP – World harmonized light-duty vehicles test procedure.

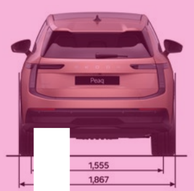

The maximum power is determined in accordance with UN-GTR.21. The maximum power is available when the high-voltage battery is at its highest possible state of charge (SoC) and operating within its optimal temperature range. The power available varies according to the driving scenario and is influenced by factors including the battery's temperature, its SoC, and the physical ageing of the high-voltage battery.

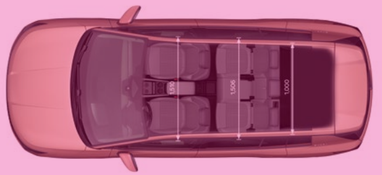

NOT FINAL

5-seater version

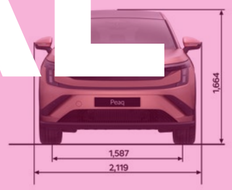

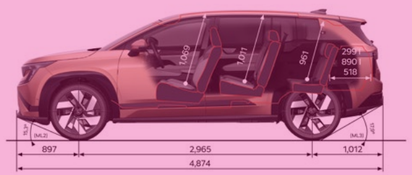

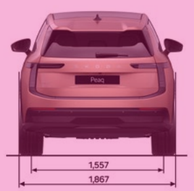

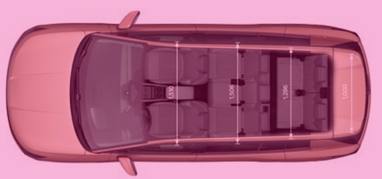

eate ion

Disclaimer

The specified values refer to the achievable charging power of a new vehicle. This may decrease with the ageing of the battery. The ageing of the battery depends on a number of factors, including the load, charge cycles, and the charging management used.
