

SKODA

Škoda Kamii

The word 'Kamii' comes from the language of the Inuit who inhabit the north of Canada and Greenland. It describes a state where something naturally 'fits like a glove' whatever the circumstances, and that's exactly what stands out as Kamii's main advantage.

Engines

Current as of July 2023

	1.0 TGI 66 kW	1.0 TSI 70 kW	1.0 TSI 81 kW	1.5 TSI 110 kW
Transmission	6-MAN	5-MAN	6-MAN & 7-DSG	6-MAN & 7-DSG
Fuel consumption	5.2-5.3 m ³	4.7-4.9 l	4.7-4.9 l	4.8-5.1 l
CO ₂ emissions	92-96 g	108-112 g	108-112 g	111-117 g

Fuel & CO₂ values starts from min. to max., based on transmission
 Fuel consumption: [l/100 km] or [m³/100 km]; CO₂ emissions: [g/km]
 TGI (CNG fuel) is combined with petrol engine

Key selling points

Full Led Headlights

Light doesn't just illuminate, it inspires. The unique headlights and slim long tail lights make the car instantly recognisable, representing a perfect blend of Czech crystal tradition and modern technology. The top-end option includes a corner function and fog lights.

Heating Functions

The heating function of the front windscreen, which quickly clears frost or steam, and heating of the multifunctional steering wheel are indispensable on cold days, enabling drivers to enjoy their journey within minutes.

Advanced Assistance Systems

The Side Assist helps when changing lanes and is best suited for use on the motorway. The Front Assist detects pedestrians crossing the street while the Lane Assist informs drivers when they are being overtaken on the road. And there are numerous other systems, such as the Adaptive Cruise Control (ACC), Manoeuvre Assist, Driver Alert, Park Assist (automatic parking), or Auto Light Assist.

Sport Chassis Control

Sport Chassis Control including driving mode select, is a system of adjustable shock absorbers. It is intended for customers who, rather than settling for normal chassis tuning, want sporty shock absorbers to improve handling when opting for a more dynamic drive in certain situations.

Virtual Cockpit

One of the most important innovations in the Kamiq is the Virtual Cockpit. The Kamiq is one of only a few models in its class to offer this. The Virtual Cockpit brings together all the key information for the driver into a single well laid-out and configurable display.

Connectivity

With the SmartLink, which supports Apple CarPlay and Android Auto, infotainment in the car allows you to use your phone safely. With Car Access our partners will deliver your order directly to your car. You can also enhance in-car connectivity with additional Web apps such as Weather, News, Digital Manual, Traffication, and many others.

Simply Clever

Kamii will surprise you with multiple Simply Clever features such as wireless in-car smart phone charging, an electric tail gate with a height memory setting, and an integrated funnel for topping up on screen wash. These and many other features will make your everyday 'living with a Škoda' so much more pleasant!

Derivatives

Dimensions

Back seat passengers can enjoy more comfort thanks to dual USB-C outlets where they can charge their mobile phones or tablets, work, or – if they are children – watch their favourite cartoons.

When you travel for adventure, you can enjoy the comfort of the Park Assist taking over the wheel – all you have to do is push and release the accelerator. This enables you to park flawlessly, even with bicycles in the rear rack.

Enjoy the illuminated interior or the starry night sky above... The panoramic roof glass has a black tint, so it will only allow a pleasant amount of light and warmth inside.

All information about the car as product, either in verbal or in visual form, has only an informative and illustrative character. They are non-binding and does not oblige to conclude a contract with the shown specification or equipment. Individual product features might differ from the actual production vehicles across markets.
