

SKODA

Škoda Karoq

The new Škoda Karoq is a versatile SUV ready to deal with any situation. Whether it's your everyday routine or exceptional circumstances, you can count on ample space for all passengers and their luggage, modern technology, and state-of-the-art connectivity.

Engines

Current as of July 2023

	1.0 TSI 81 kW	1.5 TSI 110 kW	2.0 TSI 140 kW	2.0 TDI 85 kW	2.0 TDI 110 kW
Transmission	6-MAN	6-MAN & 7-DSG	7-DSG (4×4)	6-MAN & 7-DSG	6-MAN & 7-DSG (4×4)
Fuel consumption	5.2–5.4 l	5.2–5.3 l	6.3–6.6 l	4.7–4.9 l	4.7–4.9 l
CO ₂ emissions	118–124 g	117–122 g	145–152 g		117–130 g

Fuel & CO₂ values starts from min. to max., based on transmission
Fuel consumption: [l/100 km]; CO₂ emissions: [g/km]

Key selling points

Full-Led Tail & Headlights

Full LED Matrix headlights – for the first time in a Karoq
Top full LED tail lights with dynamic indicators and an animated Coming/Leaving Home function – for the first time in a Karoq.

Electric Towbar

The new Škoda Karoq offers a handy towbar that can be released electronically by simply pushing a button in the luggage compartment. When the towbar is no longer needed, it folds easily under the rear bumper.

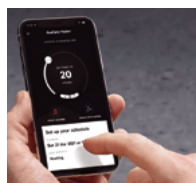

Display

The hand gesture-controlled Škoda Karoq display makes using selected features easier. The infotainment system works quickly, offers multiple services and interfaces, and is equipped with an 8" touch screen. Its ergonomically excellent position and glass design enhance the aesthetically pleasing dashboard.

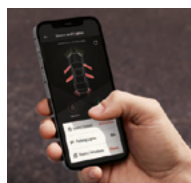

Virtual Pedal

The Škoda Karoq luggage compartment door is controlled using a remote-control key, a button near the driver's seat, or on the fifth door. Alternatively, the model can be fitted with a virtual pedal for touchless opening and closing of the fifth door – if your hands are always full, you are certain to appreciate this.

Auxiliary Heating

With auxiliary heating, you can warm your car from the comfort of your home, even on freezing days. The service can be controlled via car keys in the Škoda Connect App. When you board the car, it will have a pleasant interior temperature and thawed windows, giving you more time to prepare for work.

Always Online / Connectivity

The car's SmartLink-enabled infotainment system allows drivers to use their handsets safely, even when driving. All the certified apps installed are compatible with the Apple CarPlay and Android Auto functions. Online navigation services, including current traffic information, will always guide you smoothly to your destination.

Aerodynamics Wheels

Some of the Karoq's new wheels come with removable aero trims to improve the car's aerodynamics. These trims are easy to put on and remove, enabling customers to change the look of their car in an instant.

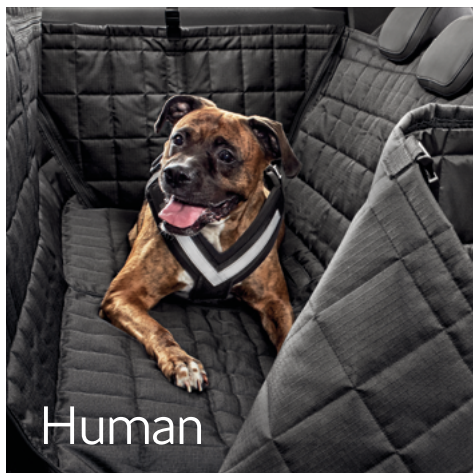

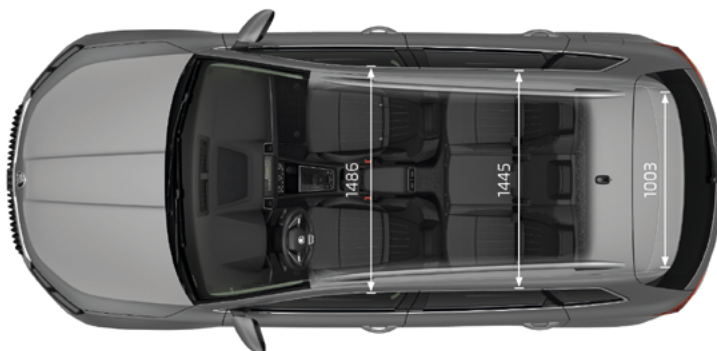

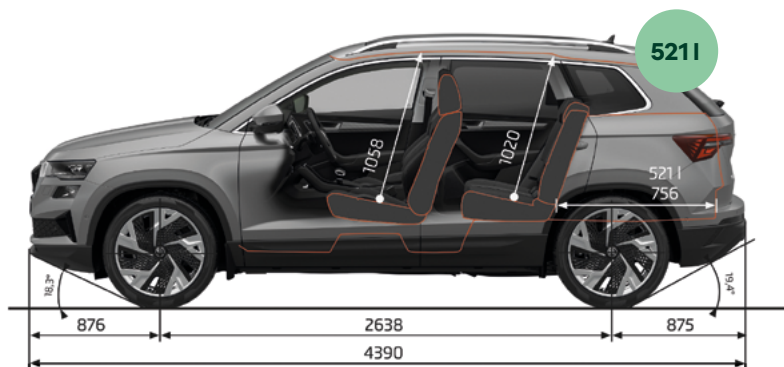

Advanced Assistance Systems

Parking has never been easier – slide into limited space just by pushing a button. The Front Assist will warn you when there is a danger of collision and will start braking in an emergency. If the driver becomes ill-disposed, the emergency assist can switch on the warning lights and stop smoothly within the lane.

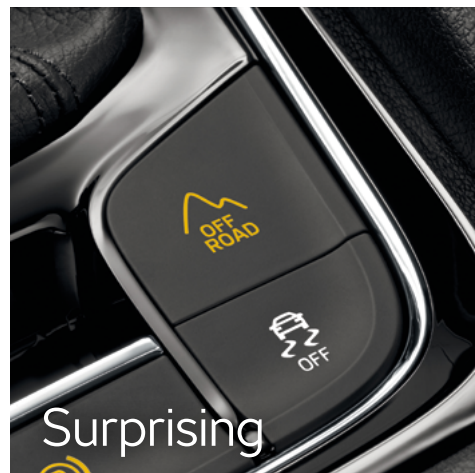

Connectivity

Dimensions

The ŠKODA KAROQ can optionally be fitted with handy tray tables with integrated cup holders that fold from the rear side of the front seat backrests. You can use them to hold your refreshments, book, or a laptop that you are working on. And, unlike on airplanes, you will definitely have ample room on the rear seats.

Are you travelling to the mountains or to the wild? Then try the magic OFF-ROAD button. This will switch all assistance systems into an off-road mode – the gas pedal will respond less sensitively, the Hill Descent Control will start braking automatically... allowing you to drive down steep slopes and tackle obstacles without any problems.
