Technical Data

Discover the new electric Enyaq

The first Enyaq set the stage for Škoda's electric future. Now, it enters a new era with a sleeker Modern Solid design and more efficient technology.

The most notable change is the sharp and stylish Tech Deck Face, replacing the traditional grille of the previous generation. This feature is part of the Modern Solid design language that will define future electric Škoda models. It's not just about aesthetics – the new Enyaq is one of the most aerodynamic Škoda cars ever, with an aerodynamic coefficient of 0.245 for the Enyaq and 0.225 for the Enyaq Coupé. Combined with a battery lineup that reaches up to 82 kWh, the car offers a range of more than 580 km.

The interior elevates the tried and tested ergonomics of the previous version to a new level. The centerpiece is the Škoda infotainment system with a 13" touchscreen, featuring a smarter layout and app download capability, complemented by the standard Virtual Cockpit. The Advanced package further enhances comfort with features like an augmented reality Head-Up Display and a Canton sound system.

The interior combines striking style with spaciousness and practicality. In some variants, it also makes use of materials with recycled content.

With the new Enyaq, you can drive and enjoy the future today.

Electrifying style

Škoda's electric pioneer steps into a new era, adopting the latest Modern Solid design language. The sleek and stylish Tech Deck Face replaces the traditional front grille and gives the car an unmistakably electric look. The dynamic elegance is further underscored by the unique dark chrome accents on the lower bodywork – the front bumper on the Enyaq with a spoiler, aerodynamic side sills, and rear bumper with a diffuser.

Tech Deck Face

The Tech Deck Face is a modern, glossy black interpretation of the traditional Škoda grille, which also houses functional elements like front radar. It is flanked by the angular, robust running lights, while the main headlights are mounted lower.

Stylish rear

The new Modern Solid design language also comes with its own font, which is used for the Škoda lettering on the Enyaq's tailgate, replacing the traditional logo badge. The new font is also used for the model name and battery size on the lower part of the tailgate.

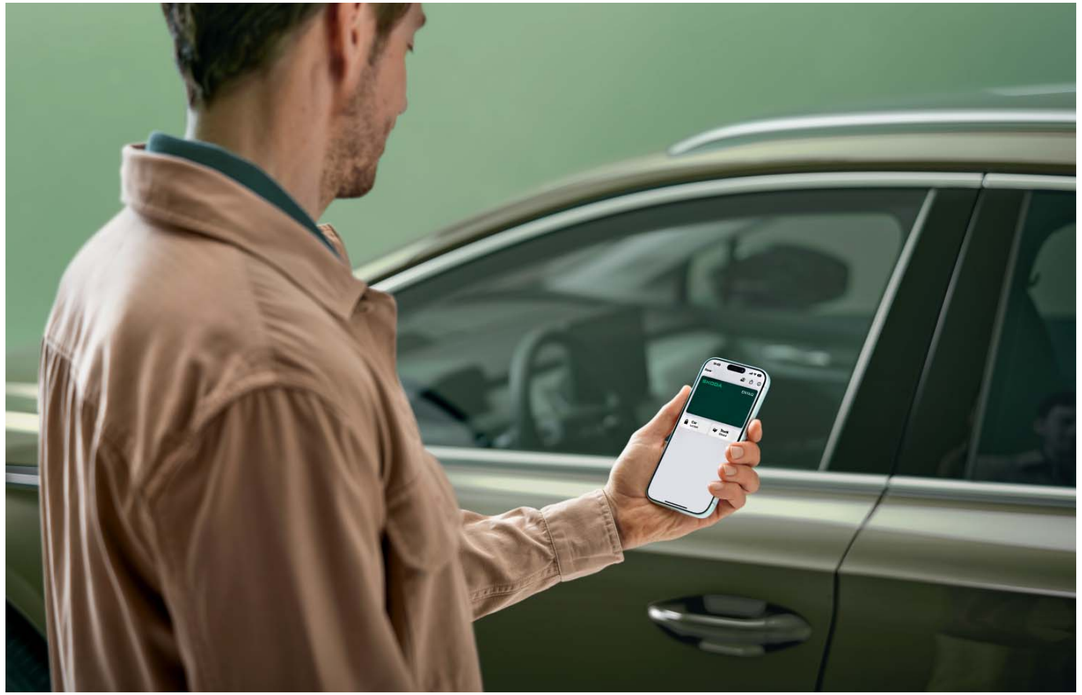

Rear lights

The actively illuminated crystalline shapes turn the Enyaq's taillights into shining jewels. The stunning effect is emphasised by the animated turn signals and Welcome and Goodbye effects when approaching or leaving your car.

Two-level headlights

While the LED daytime running lights are part of the new Tech Deck Face, the main headlights are positioned lower. They are incorporated into the air curtain intakes, highlighting the combination of great, vibrant looks and more efficient aerodynamics than ever before.

Virtual Pedal

Opening and closing the boot is effortless, even when your hands are full. The boot can be equipped with a Virtual Pedal that activates by simply making a forward kicking motion under the bumper. This feature is available exclusively with the power-operated boot.

Digital Key

There's no need to carry a physical key anymore. Just install the Digital Key on your phone. It works just like a normal key. You can also share the key via the Wallet app.

Your choice of style

The quiet speed of an electric vehicle is perfectly complemented by a refined and comfortable interior tailored to your taste. You can choose from six Design Selections, which combine refined style with materials with recycled content, such as Technofil, or olive-tanned leather. For a truly unique style, details such as contrasting stitching or even orange seatbelts are available for some of the Design Selections.

Cockpit of the future

Everything important right in front of you. The 5.3" Virtual Cockpit is designed to display all the key information while keeping it clean and easy to digest. Besides standard driving data, you can highlight navigation, driving assists, or both. Everything can also be displayed on the augmented reality Head-Up Display, like the "floating" navigation arrows.

Enjoy full control

Everything you need to know, exactly where you need it. The combination of Virtual Cockpit, 13" infotainment display, and augmented reality Head-Up Display allows information to be sorted by importance, so it's easy to focus on what's most important while still keeping track of everything else.

Infotainment

The world at your fingertips. The new infotainment system now provides a more customisable experience and features an improved menu structure, three basic buttons for easy access, and redesigned navigation. The 13" touchscreen remains and still offers sharp looks and smooth performance.

Electric seats

Perfectly tailored comfort for all. Electric adjustment makes it easy to find the seating position that is perfect for you, while the carefully designed shape offers ample lateral support while still retaining a cushy and comfortable feel.

The new steering wheel

The Modern Solid Škoda lettering on the centre is the new focal point of the Enyaq's steering wheel. It is multifunctional and comes with leather upholstery as standard.

Always charged

The magnetic holder charges one phone using the Qi2 standard at up to 25 watts and holds it securely in place for best charging efficiency. The compartment is easily accessible and provides cooling for the device to prevent it from overheating. This compartment is easily accessible and offers space for a second smartphone beside the one being charged.

Jumbo Box and centre console

Electronic devices can be safely stored in the Jumbo Box located in the front armrest, while small items can be placed in a removable tray. The centre console also features two easy-open cupholders.

Connectivity

Always stay in the picture. With MyŠkoda application, you can access important information about your car and control it remotely from your phone. The new Enyaq also comes with Pay to Park and Plug & Charge functions. With Apple CarPlay or Android Auto, you can safely and easily use selected smartphone apps on the infotainment screen.

Panoramic roof

Enjoy the view of the skies. The optional panoramic roof offers not only great views, but also lets more light into the cabin, making it feel much more airy. In the standard Enyaq, the front part can be opened, while in the Enyaq Coupé, the whole glass roof is fixed in place.

Smart ideas for every day

Every day can be made better with smart ideas. The Enyaq offers a long list of ingenious details that will surprise you and make your life on the road much easier.

Rear seats

Your passengers in the rear can also enjoy the true comfort of the Enyaq. Ample room is standard, with the option to upgrade to heated outer seats and leather upholstery for maximum comfort. For little passengers, there are Isofix mounting points on the outer seats.

Boot space

In its standard configuration, the Enyaq offers 585 litres of cargo space, or 570 litres in the Enyaq Coupé version. If you need even more space, you can increase the useable volume to 1,711 litres for the standard version and 1,610 for the Enyaq Coupé by folding down the rear seats. And it is not just about space – with its various smart features and compartments, the Enyaq takes the ease of transporting both small and large items to another level.

Net programme

Organize your cargo efficiently with the net system. A set of elastic nets on the bottom and sides of the boot, as well as on the rear seat backs, will secure your luggage and other items in place. This ensures that everything remains intact and easy to find, preventing any damage due to shifting during the journey.

Frunk

Keep your charging cables and other necessities always to hand. The front trunk, or frunk, under the front bonnet is always accessible, even when the luggage compartment is full. Its 21-litre capacity provides enough space for cables and various small items.

230 V socket in the boot

Power for your appliances, anywhere you go. With 3.6 kW of power and 16 amperes, you can easily run most household and camping appliances such as refrigerators, grills, and kettles, or even power tools like drills or electric chainsaws. Turn your car into a mobile power station.

Traffic Sign Recognition

Never miss a traffic sign – or a traffic light. The improved Traffic Sign Recognition system is now able to distinguish traffic light colours and reacts to stop signs. It also displays the current speed limit and other relevant traffic signs.

Travel Assists

Your co-pilot is now even better. The improved Travel Assist 3.0 is now able to follow the vehicle in front and offers improved lane guidance and lane change. In case of emergency, the car is able to stop safely on the side of the road. Using online data allows for more precise reactions around traffic islands, railway crossings, and speed bumps, as well as improved traffic sign recognition, including temporary ones. Also new is the ability to detect traffic lights and all the sensors have also been improved and updated.

Door Opening Warning

When you stop your car and open the door (to get out), the system can detect other road users, such as vehicles, cyclists, runners, pedestrians, etc. up to a distance of 35 m. If it detects an approaching object, it warns the crew in the front and rear, both visually and audibly, about getting out of the vehicle.

Turn Assist and Collision Avoidance Assist

Turn Assist monitors opposing traffic when turning left at low speeds between 2–15 km/h. In critical situations, it can stop the vehicle and turn on the warning lights. Collision Avoidance Assist supports the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing the accident with a controlled evasive manoeuvre.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Reversing Assist

Reverse easily even from a difficult spot. The Reversing Assist remembers up to 50 metres of your route and will automatically reverse back in the exact same way. Just tap the button on the infotainment screen.

Additional experts on board

To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Intelligent Park Assist

Let your car find and offer you parking spaces. Select one and then just sit back and watch. The Enyaq will autonomously drive itself into the parking space, without the driver having to touch the wheel or pedals.

Pre-Crash Assist

Your car can now predict a collision coming from any direction – not just from the front, but also from the sides and rear. If an accident is imminent, it prepares for it by pre-tensioning the seatbelts and closing the windows and roof.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Remote Trained Parking

Train your car to perform a parking manoeuvre and oversee the process from the outside. Remote Trained Parking is a highly advanced parking assistant which enables the car to perform familiar parking manoeuvres without the driver being present in the car. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself, as long as you stay next to it and monitor the process for safety. You simply monitor it from the outside, using your phone app.

Trained Parking

A highly advanced parking assistant is used to automatically complete a parking manoeuvre in a familiar environment, e.g., at home. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself. You simply monitor it from the driver's seat.

Crossroad Assist

Hard to see cars, bikes, or pedestrians at intersections? This system detects them using front corner radars and displays a visual warning on the Virtual Cockpit. It works from 0 to 60 km/h.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Loft interior

Clip Soul pad with grey stitching
Alu Brushed décor
Grey fabric/Clip Soul grey Techtona

Essence

The entry-level Essence version already comes with a long list of technology and equipment features. It includes 3-zone Climatronic, 13" Digital Display, and 5" Virtual Cockpit in front of the driver. The multifunctional steering wheel, four USB-C ports, and advanced driving assists like Predictive Cruise Control, Lane Assist, and Traffic Sign Recognition are also included. The Essence trim is available with the Loft interior Design Selection.

Loft

The seat upholstery combines Techtona with grey embossed fabric. It is tastefully complemented by the Alu Brushed décor on the dashboard and Clip Soul dashboard pad.

Lodge interior

Grey Techtona pad with orange stitching
Fairy Dust décor
Grey Techtona/black Technofil upholstery

Selection

The rich list of equipment for the Selection version includes heated multifunctional steering wheel, 7 airbags, KESSY with automatic locking and unlocking, Drive Mode selection, 13" infotainment with navigation, wireless SmartLink or front and rear parking sensors plus reversing camera. The Selection trim is available with a choice of four interior Design Selections.

Lodge

The seat upholstery in a combination of Techtona and Technofil fabric with recycled content in black and grey contrasts with the orange stitching and seatbelts. The Fairy Dust décor on the dashboard and doors is complemented by the grey Techtona dashboard pad with orange stitching.

Lounge interior

Techtona/Suedia Grey pad with Grey Mint stitching
Mutant Cocoon décor
Techtona/Suedia Grey mint upholstery

Lounge

The seat upholstery in a combination of Techtona and Suedia Grey details, including stitching, creates an unmistakable look. The style is underscored by the Mutant Cocoon décor and Suedia Grey décor.

Suite Black interior

Techtona pad with Cognac stitching
Diacut Cross décor
Black leather/Techtona upholstery with Cognac stitching

Suite Black

The black leather upholstery with Cognac stitching makes the interior look and feel luxurious, while the optional black headliner adds a dynamic flair. This is further emphasised by the Diacut Cross décor on the dashboard and black leather dashboard and door pads with contrasting brown stitching as a finishing touch.

Suite Cognac interior

Techtona pad with Cognac stitching
Diacut Cross décor
Cognac leather/Techtona upholstery with Cognac stitching

Suite Cognac

The Cognac leather upholstery with contrasting stitching makes the interior look and feel luxurious. This is further emphasised by the Diacut Cross décor on the dashboard and Cognac leather dashboard and door pads with contrasting stitching as a finishing touch.

L&K Shell interior

Techtona pad with Cognac stitching
Piano Black décor
Shell leather upholstery with Cognac piping

L&K Shell

For a supremely luxurious look and feel, the L&K interior was designed using the finest materials and style. The focal points are the leather seats with contrasting Cognac piping. The Techtona pad is the same colour with contrasting Cognac stitching. The final touches of elegance are the Piano Black décor and black headliner.

Sportline

Energise your drive

Looking for a car that's efficient, yet still fun to drive? The Enyaq Sportline offers the best of both worlds. It features sporty accents such as blacked-out trim, side mirrors, a unique badge, and specialized wheels. The Sportline Design Selection is available across all battery versions, combining performance with style.

Style and functionality

The most typical attributes of the Enyaq Sportline version are the black glossy features, such as the exterior rear-view mirror caps, side window frames, roof rails, and Škoda lettering on the tailgate. Together, they bring more dynamism and emotion to the vehicle's appearance. The full LED Matrix headlights and Vega 20" alloy wheels come as standard. The final touch is the black Sportline badge on the tailgate.

Comfortably zoomed

Fancy more dynamism and exclusivity in your everyday commute? The Sportline interior comes with black Techtona and Suedia upholstery with grey stitching. The Carbon décor brings the whole effect over the finishing line.

Sportline interior

Techtona pad with grey stitching
Carbon décor
Suedia/Techtona upholstery with grey stitching

Design Selection Sportline

For a more dynamic feel, the Sportline Design Selection combines leather and Suedia upholstery with contrasting grey stitching and adds Carbon décor as a final sporty touch. The dashboard and door pads combines Techtona with contrasting stitching.

RS

Swift and silent

With its 250 kW of instant electric power, 4x4 drive, and sports chassis providing impeccable grip, the Škoda Enyaq RS offers impressive performance. Its spacious interior lets the whole family share in the thrill of the ride.

A sporty drive deserves a sporty look

In both body styles, the new Enyaq RS is easily recognisable by its unique RS bumpers and air curtains, as well as the stunning Tech Deck Face with Light Band. The glossy black elements such as the side mirrors, roof railings, and window trim add to its visual dynamism. The stunning look is finished off with the set of 20" Draconis wheels or optional 21" Vision wheels, both with Aero covers. The Enyaq Coupé RS features a sleek silhouette with the fastback roofline, which not only enhances the sporty look, but also aerodynamics and efficiency.

RS badge

As a nod to the famous racing tradition of Škoda cars, the sporty RS badge is included on the sides.

The office of speed

Charge your daily commute with a dynamic style and exclusive materials. The RS interior comes with a combination of Techtona and Suedia upholstery with lime stitching. The Carbon décor is a perfect finishing touch for the whole sporty look.

RS Lounge interior

Suedia pad with lime stitching
Carbon décor
Suedia/Techtona upholstery with lime stitching

Design Selection RS Lounge

For a sporty yet exclusive style, RS Lounge combines leather and Suedia upholstery with contrasting lime stitching, plus Carbon décor as a dynamic finishing touch. The dashboard and door pads combine Suedia with lime stitching.

RS Suite interior

Black Techtona pad with textured finish
Carbon décor
Embossed leather with grey piping

Design Selection RS Suite

RS Suite offers a dynamic look with added premium style. The leather upholstery is highlighted with stylish grey piping, while the black Techtona with textured finish on the dashboard pad and doors elevates the upscale look even further. The Carbon décor adds a final touch of sportiness.

Accessories

Genuine Accessories that perfectly fit your car

Just like perfectly tailored clothes, the Enyaq needs a few finishing touches to make it truly yours. Fine-tune your Enyaq to your exact taste and needs with Škoda Genuine Accessories and enjoy a one-of-a-kind experience.

Enhance the looks with a choice of wheels and design details like mirror caps or specific door sills. Give the interior a more upscale look with premium carpets or make it more rugged with all-weather mats.

There are also other ways to make your life easier. A plethora of holders, hooks, charging cables, and smart ideas like door-mounted bins and entertainment packages for rear passengers will make your travels a real joy.

The safety of you and your passengers, big and small, as well as your four-legged friends, is always our first priority. That's why we offer not only a comprehensive range of child seats, but also seatbelts for your dogs.

Anything you need to take with you will find its secure place in the boot thanks to various clever features and ideas.

Make your Enyaq just perfect for you.

Technical Data

Technical specifications Enyaq	60	85	85x	RS
Engine				
Power (kW)	140	210	220	250
Torque (Nm)	350	545	134 (front); 350 (rear)	134 (front); 545 (rear)
Battery capacity (kWh) – gross	61	82	82	82
Battery capacity (kWh) – net	58	77	77	77
Performance				
Maximum speed (km/h)	160	180	180	180
Acceleration 0–100 km/h (s)	8.6	6.6	6.3	5.4
Range – WLTP (km)	428–457	546–584	546–584	513–569
Energy consumption WLTP (kWh/100 km) – combined	15.0–16.1	15.1–16.3	15.3–16.5	15.7–17.6
Drive type				
Drive	Rear-wheel drive	Rear-wheel drive	All-wheel drive	All-wheel drive
Charging				
AC (0–100%) – power/time (according to the type of cable)	11 kW/6.5 h	11 kW/8.5 h	11 kW/8.5 h	11 kW/8.5 h
DC (10–80%) – power/time	105 kW/26 min	165 kW/29 min	165 kW/29 min	165 kW/29 min
Weight				
Kerb weight – in standard version without driver (kg)	1,989–2,125	2,042–2,163	2,109–2,231	2,166–2,302
Payload – incl. driver and extra equipment (kg)	475–611	487–608	519–641	448–584

Further specifications

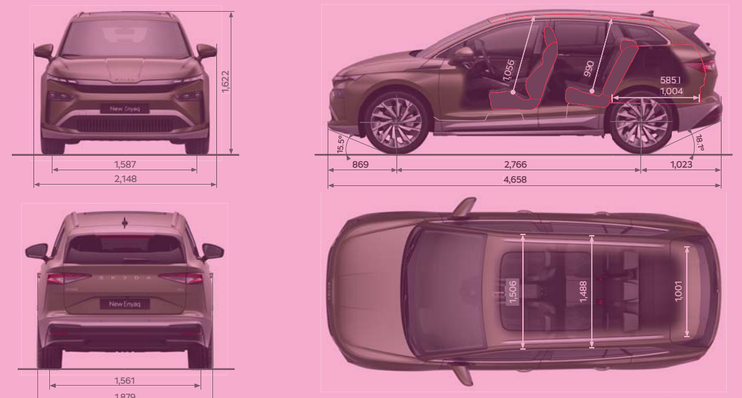

Body		Front brakes	Internally cooled disc brakes, single piston for the 60; two-piston for the 85, 85x and RS
Type	5-seater, 5-door, 2-compartment	Rear brakes	Drum brakes
Chassis		Clearance (mm)	183 (for the 60); 186 (for the 85); 181 (for the 85x); 167 (for the RS)
Front axle	McPherson suspension with a sheet metal subframe and lower wishbones	Luggage storage space (max. l)	
Rear axle	Multilink axle, with five transverse arms, without a longitudinal arm	Without spare tyre, with rear seat backrests – upright/down	585/1,710

The maximum power is determined in accordance with UN-GTR.21. The maximum power is available when the high-voltage battery is at its highest possible state of charge (SoC) and operating within its optimal temperature range. The power available varies according to the driving scenario and is influenced by factors including the battery's temperature, its SoC, and the physical ageing of the high-voltage battery.

WLTP – World harmonized light-duty vehicles test procedure.

Specifications may differ depending on the battery version and chassis configuration.

Disclaimer

The specified values refer to the achievable charging power of a new vehicle. This may decrease with the aging of the battery. The aging of the battery depends on a number of factors, including the load, charge cycles, and the charging management used.
